

**REMARKS**

This letter is a re-submission of a response to an Office Action mailed April 25, 2003 with revisions according to a Notice of Non-Compliant Amendment mailed August 18, 2003. In this re-submission, the claims have been rearranged and marked to comply with current 37 CFR 1.121 requirements. Additionally, although the remarks have been revised to correctly describe the revisions, the arguments have not been changed.

There has been some confusion over which claim set was referenced in previous communication with the Examiner. In the preliminary amendment applicants referred to the PCT published claims since the IPER had not yet been issued. The Examiner referred to the later issued IPER claims when examining the file.

To set the record straight, applicants currently refer to the same claim set, containing 88 claims, that the Examiner has utilized in the examination process.

Claims 89-111 have been added to further define the invention.

The applicant respectfully re-presents claims 4, 22-43 and 85 as new claims 112-135 respectively. The new version of these claims has been amended to remove multiple dependencies and to reference the correct dependent claim based on the new numbers.

Claims 44-84 remain previously canceled without prejudice.

Claims 1, 14, 16 and 21 have been amended to enhance clarity.

Claims 3, 5, 7, 9, 10, 12, 13, 15, 17, 19 and 86 have been amended to remove multiple dependencies and/or reference the correct claims according to the above amendments.

In paragraph 2 of the office action the Examiner states that claims 5-13, 17-20 stand rejected under 35 U.S.C. 112 because "said database" has insufficient antecedent.

Applicants hereby re-present claim 4 as new claim 112 and have amended claim 5 to reference this claim, thereby providing an antecedent for dependent claims 5-13. The applicant has amended claims 16 and claim 17 to provide claims 18-20 with a proper antecedent.

In paragraph 6 the Examiner states that claims 1-3, 5-21 stand rejected under 35 U.S.C. 102 (e) as anticipated by Teare et al. (US Patent 6,151,624).

Applicants respectfully point out that the applicants' invention predates that of Teare et al., removing the examiner's rejection to claims 1-3 and 5-21. The filing date of Teare et al. is Feb. 3, 1998 while the instant application (priority date) filing date is January 30, 1998.

In paragraph 3 the Examiner states that claims 86-88 are objected to as depending from canceled claim 85. The Applicant hereby re-presents claim 85 as claim 135 to render appropriate antecedent for claims 86-88. Claim 86 has been amended accordingly.

In paragraph 4 the Examiner states that claim 16 is an independent claim and does not depend from claim 13 as disclosed in the preliminary amendment. As explained above applicants were referring to a different set of claims. Accordingly, this statement in the preliminary amendment should be disregarded in addition to other requested changes which do not fit the claims used by the Examiner.

The phrase "of a page of said site" has been added to independent claims 1, 14, 16 and 21 to clarify the claim preamble and merely states explicitly that which was previously implied. A period was added at the end of claim 14. This is clearly a typographical error.

New independent claim 89 and claims 90, 99 and 103 that depend upon claim 89 have been added to further clarify the invention.

Claims 91-98, 100-102, 104-111 are new claims that depend upon original independent claims and serve to further clarify the invention.

In view of the above amendments and comments, applicants submit that all rejections are rendered moot and allowance is respectfully requested. Early and favorable consideration is earnestly solicited. In the event that the Examiner believes that there are problems which would make it impossible to issue a favorable response, the Examiner is respectfully requested to call the undersigned at 1-877-428-5468, which is a US toll free number connected directly to our offices in Israel (please note the 7 hour time difference).

Respectfully submitted,  
Aviv REFUAH et al.
